ADULTS

JUVENILES

FILED:

DATE: JUL 3 1969

With regards to this file, whilst enquiries were made in the 300 block Avenue O, South, on April 5/69, I had occasion to interview Mrs. Helen Gessey, Tel. No. 382-1974, and at this time she advised me that as close as she could recall, it was only a few days after the offence of the murder of the Miller girl, she had observed a blue tuke on the boulevard portion of the front of her house, which is between the actual street and her fence line, which appeared to be covered with a red substance possibly blood, this being such a nastysight, she had taken this and removed it to her rear yard. I, in turn, checked where she shoed me she had thrown this tuke and found same and it appeared to have blood on it. It was brought to the Police Station where it was turned over to Lieut. Penkala on April 7/69.

At this time, mention should also be made of other information which has apparently not been attached to this file. This being, in fact, the portion where Albert Cadrain, the informant in this matter, advised myself and Lieut. Short, that at the time himself, along with Milgaard, Wilson and Nicholjohn attended in Calgary, the girl Nicholjohn and Wilson had left the car at one time, and at this time David Milgaard approached Cadrain and made suggestions to the effect that he would obtain a gun for Cadrain to dispose of the other two as they apparently knew too much. Cadrain advised that although no gun was in sight and he never heard Milgaard speak of one at any other time, he does recall that these are the words which were said to him, and it obviously was in reference to a gun. Cadrain was questioned extensively in this, however, stuck to this particular story.
