A: Wondering why license member of vehicle was never brought out a trial.

Within a couple of days two detectives attended the service station and asked me to go to the car. When I got there they wanted me to identify a guy in the back seat. I refused to identify him as I had a wife & 5 kids and didn't appreciate them bringing him there to the service station. They sent a couple of other policemen to talk to me after and I agreed to go to court with the information I knew. Other than this incident I felt the police were doing their job well. There was no pressure for me to say anything more.
